Journal of Luminescence 114 (2005) 319–320

JOURNAL OF LUMINESCENCE

www.elsevier.com/locate/jlumin

Subject Index

1,10-phenanthroline 77
1,8-naphthalimide 125

Absorption spectrum 101, 213
Accelerated current test 39
Acid–base equilibrium 213
Afterglow 131
Anti-site defects 85
Associative defects 9

Band structure calculation 255
Blue emission 155

Carborane 60
Cascade 267
Cathodoluminescence 227, 275
Cation-state probability 145
Ce-dopant 85
Charge-transfer excitation 155
Color center 155
Complex oxides 255
Conjugated backbone of polymer 241
Core-shell 15
Csbr:Eu^{2+} 24
$CsGd_2F_7$ 65

Degradation 39
Downconversion 65
Dye/matrix interaction 162

Efficiency 53
Electronic structures 241
Emission 131
Emission cross-section 167
Energy transfer 43
Er:YAG 43
ESIPT 101
Estimated lifetime 39
Europium 247
Europium complex 187
Excimer 31
Exciplex 60
Excitons 85

Fd-transition 255
Fluorescence spectrum 101, 213
Fluorescent probe 125
Fluorescent sensors 125
Fluorides 247, 255

Garnets 85
Gd_2O_3:Eu 275
Glass 178

Halite 234
Hexa-aluminate 207

Infrared photoluminescence 9
Interchain interaction 31
Irradiation 293

Judd–Ofelt theory 1, 167, 247

Lanthanide complexes 281
Lanthanides 77
Laser 178
Laser dye 162
Luminescence 15, 60, 77, 85, 131, 187, 255, 293, 299, 307
Luminescence properties 247
Luminescent properties 1

Methyl 3-hydroxy-2-quinoxalinate (M3HQ) 101
MgF_2–BaF_2–$Al(PO_3)_3$–$Ba(PO_3)_2$ glass system 167
MO-PPV 31
Molecular structure 31
Multiphonon relaxation 167

Nanoparticles 15
NaYF4:Er 53
Near infrared 307
Near-infrared emission 77
New account of electron back transfer 145
Non-amphiphilic 197

Optical amplifier 307
Optical damage resistance 288
Optical dating 234
Optically stimulated luminescence 234

doi:10.1016/S0022-2313(05)00173-0

PEO 187
PET 125
Phosphor 65
Photoemission 15
Photoluminescence 31, 71, 95, 118, 137, 227, 241, 281
Photoluminescent pigment 131
Photonic band gap 118
Photostimulated luminescence 24
Pr 227
Prototropic equilibriums 101
PVP 187
PVS 187

Quantum cutting 65, 267
Quantum dots 95
Quantum splitting 267
Quenching 137, 267

Radiation-induced defects 24
Rare earth 43, 77, 178, 255
Rare earth borate 299
Red shift 95
Reversible electron transfer 145
RF magnetron sputtering method 71
Rhenium 60
RHO6G dye 15

SHI irradiation 95
Single crystals 85
Single-crystalline films 85
SnO_2:Sb films 71
Sol–gel 178, 281
Sol–gel glass 77
Space averaging procedure 145
Spectroscopic characterization 288
Spectroscopy 53, 77
Spray pyrolysis 118
Sputtering power 71
Storage phosphors 24
Synthetic opal 118

Tetraethylorthosilicate (TEOS) 15
Theoretical calculations 101, 213
Thin film 299
Titanium-doped spinel 155
Tunable solid state dye laser 162

Upconversion 43, 53
UV–vis 95
UV-vis absorption and fluorescence spectroscopy 197

Vacuum ultraviolet 65
Valence change 178

Wet chemical process 299
White LED 207
White light-emitting diodes 39

X-ray 24
XRD 95

Y_2O_3:Eu 275

Zinc ion 125
Zn:Yb:Er:$LiNbO_3$ 288
ZnO 118
ZnS:Mn^{2+} nanoparticles 293
